Barber Shop Management System

The Barbershop Management System is a comprehensive software solution developed using **C#**, **.NET Framework**, and **DevExpress 24.1**, designed to streamline and optimize barbershop operations. The system includes the following core functionalities:

1. **Customer Queue Management**:

   o Real-time tracking of customer queues to minimize wait times and improve service efficiency.

   o Supports both walk-in and appointment-based customers, ensuring a smooth and organized experience.

2. **Payment Handling**:

   o Integrated payment processing to handle cash, card, and digital transactions seamlessly.

   o Features for tracking service charges, tips, and payment history.

3. **Reporting and Analytics**:

   o Generates insightful reports using Crystal Report.

   o Facilitates data-driven decision-making to improve operational efficiency.

Key Benefits:

- Improves barbershop efficiency by **20%**, reducing manual processes and operational bottlenecks.

- Ensures user-friendly interaction with intuitive **DevExpress UI** components for smooth navigation and operation.

- Enables barbershop owners to make informed decisions with analytics and reporting features.

1. Queue Menu

2. Payment Menu

3. Master Item Menu
